

This is a memory cards game. There are six pairs of cards. Two players get to take turns flipping cards. If the cards do not match, the cards flip back over and the next player gets a turn. If a player flips two cards and they match, that player gets a point and gets an extra turn, and the cards disappear. The game is over when all of the cards have disappeared. Whoever has the highest score is the winner, and the points are on top of the screen. To reset the game, press the reset button, and the cards will shuffle. The points for both players are set to zero. Press the Help Page button to go to the help page and the Return button to return for the game.
