

This is a Vacation Packages app. You register and sign in, and you get to choose three vacation packages: Tahiti, Toronto, and Barcelona. When you click on each, you get to a view with buttons: These buttons let you view a website containing flight information, accommodations and entertainment, a map containing the locations for the city and the accommodations and entertainment, and reviews. If you want to exit the map and accommodations and entertainment views, you can just slide the view down. On the map, you might have to zoom in with your fingers to see all of the locations. When you click on the reviews button, you can see reviews from other users of the app and you can write your own review.
