This is a Password Reminder app for websites. Enter your username and password and click on Register User to make a new user. Then click on Sign In. Click on Add Item to add new information or Sign Out to go to the login screen. On the Add Item screen, enter information into the four fields then press Save to enter another website's information. If not all of the fields are filled, you will get an alert. Press Back to go back to the Website Table screen. The Generate Password button will generate a password. Drag a cell to the left to delete it. Click on a cell to view information about it. You can edit the information as soon as you go to the information view and click on Update/Activate Link to update your information and make the link clickable if it is not a proper link before editing. Clicking on the link will take you to the website.
